

Select your Service Bundle

For many End-Users, there are either *internal* or *external* requirements that involve intervention beyond the Smart Fail-Safe diagnostic capabilities of the GasFinder - the following bundles have been created to easily meet *your* obligations & minimize *your* maintenance burden.¹

\$9,995 USD
per unit/per year² **beyond bundle**

-  **Yearly Calibration Extension**
Quarterly Health Check (Remote)
-  **Factory Calibration**
Every five (5) years
-  **PM & Training Visit (with Loaner)³**
Every two and a half (2.5) years
-  **Extended Warranty**
Full ten (10) year protection
-  **Technical Support**
Premier (Remote)

\$6,150 USD
per unit/per year² **basic bundle**

-  **Yearly Calibration Extension**
Quarterly Health Check (Remote)
-  **Factory Calibration**
Every five (5) years
-  **Technical Support**
Premier (Remote)

\$3,950 USD
per unit/per year² **bare bundle**

-  **Yearly Calibration Extension**
Quarterly Health Check (Remote)
-  **Technical Support**
Premier (Remote)

Note 1: To minimize the administrative burden, the Life-Cycle Support Package is structured as an autorenewal contact.

Note 2: Each additional GasFinder unit saves 20% on the 'per unit/per year' fee.

Note 3: Additional travel costs may apply for customers outside of Canada or the United States.

Details of each Service Offering

YEARLY CALIBRATION EXTENSION

The *Calibration Extension* provides you with a yearly Calibration Certificate Extension without sending the GasFinder unit to the factory. By providing *diagnostic data on a quarterly basis* to Boreal Laser's Team of Technical Specialists, they will perform a health check and provide a *Quarterly Health Check Report*. The intention is to pre-emptively predict maintenance interventions such as HF Reference Cell replacements.

FACTORY CALIBRATION

Without the *Calibration Extension*, the manufacturers recommended service interval is every (2) years – however, by reviewing the diagnostic data on a quarterly basis, this can be extended to every five (5) years. The *Factory Calibration* is the perfect time to replace the Internal Hydrogen Fluoride (HF) Reference Cell (if applicable) and provide you with the latest version of firmware.

PREVENTATIVE MAINTENANCE (PM) & TRAINING TRIP (with 'Loaner' GasFinder)

Let us train your (new or existing) technicians, engineers, and operators not only how to maintain the GasFinder, but also what it is capable of and how to get the most out of it. Every second trip (i.e., five (5) years), we'll bring a 'loaner' GasFinder with us, so you'll continue to remain in operation while your GasFinder is receiving its *Factory Calibration*.

EXTENDED WARRANTY

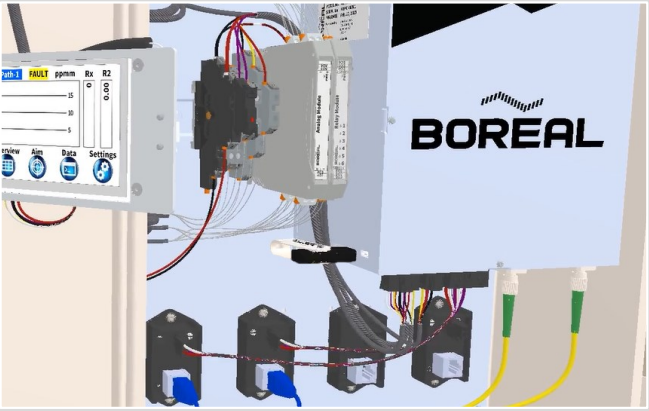

You have enough to worry about, lets take the worry of finding funds to pay for electronic component failures off your plate – with the '*beyond bundle*', it does just that! Here you'll have additional coverage in case of equipment breakdowns, malfunctions, or reoccurring faults.

TECHNICAL SUPPORT

You will have a primary contact assigned that will act as your one-call for all matters relating to Boreal Laser. Here they can provide remote support for the hardware along with providing insights into the characteristics and behaviors of the system's performance.

Obtaining your Diagnostic Data

Note: The *Calibration Certificate Extension* ensures that your critical measurement is providing you with the assurance you require.

The easiest way to retrieve the diagnostic data from the GasFinder is to install a USB Stick to which the data is automatically download each day at midnight.

Collection of Data is both Simple and Easy
With automatic data download to the USB stick

Logfiles Automatically Downloaded
Onto USB stick each night at midnight

Simply Remove the USB Stick
Transfer the files to your PC & email to [data@](mailto:data@boreal-laser.com)

Replace USB Stick in Laser Analyzer Module
For the continued downloading of diagnostic data

Quarterly Health Check Report

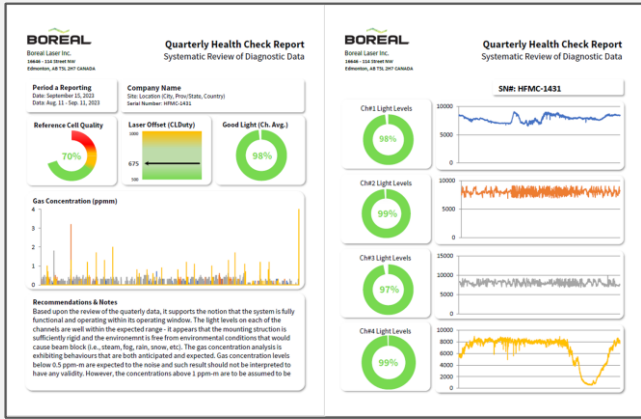

Note: With the *Calibration Certificate Extension*, you have access to *premier technical support* that extends beyond basic operability.

Satisfy Reporting/Testing Requirements
With the Calibration Certificate Extension

Quarterly Review of Systems Performance
The report details light level and gas excursions

Anticipate Predictive Maintenance
Such as the replacement of HF Reference Cells

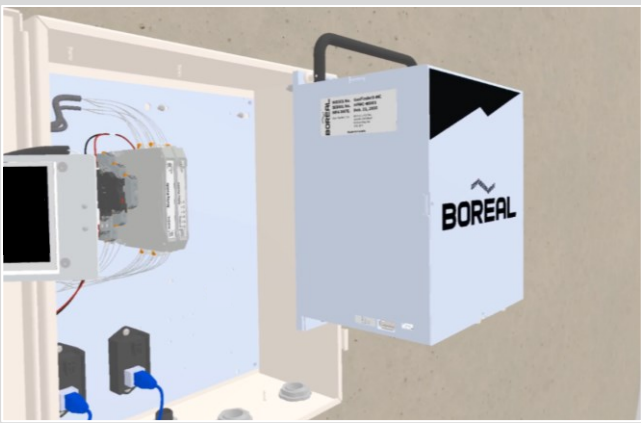

Calibration Certificate Extension
Is valid throughout the current calendar year

After receiving your diagnostic data, Boreal Laser will provide you with a report that provides data insights and predictive maintenance needs.

Factory Calibration Made Easy

Note: The *Calibration Certificate Extension* pushes the Factory Calibration to five (5) year intervals rather than every two (2).

For the GasFinder3-MC, the only item that needs to be returned to the factory for calibration is the Laser Analyzer Module.

End-User Intervention Made Easy
With the innovative Laser Analyzer Module

Remove Laser Analyzer Module
By disconnecting cabling and set screws

Factory Calibration Turnaround Time
Typically returned 3-4 weeks after removal

A 'Loaner' Laser Analyzer Module Available
With the beyond bundle offering
